**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

### Office Action Summary

**Application No.**

10/644,225

**Applicant(s)**

KELLER, IGOR

**Examiner**

ANDRE PIERRE LOUIS

**Art Unit**

2123

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 28 December 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-41 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-41 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-946)
- 3) ☐ Information Disclosure Statement(s) (PTO/SG/US)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

**DETAILED ACTION**

1. The amendment filed on 12/28/2007 has been received and fully considered.
2. Claims 1-41 are still pending and presented for examination.

**Response to Arguments**

3. Applicant's arguments filed 12/27/2007 have been fully considered but they are not persuasive.

3.1 Regarding Applicant's assertion that Lee calculates the worst case timing event and does not select a timing event propagated to the input of the gate as claimed, the Examiner respectfully disagrees and notes that Lee et al. does teach the selection of at least one timing event propagated to input gate (*see for example fig.11, also col.1 lines 23-27 and col.6 line 31-col.7 line 30*). Again, Lee et al. goes on to disclose that the determined signal is determined at the gate including an arrival time and a slew rate (*see abstract, also see col.2 lines 16-33, just to name a few*), and further determined a worst-case arrival time and signal propagation (*see col.3 lines 32-col.4 lines 43 and fig.11*).

3.2 While the applicant believes that the independent claims, along with the dependent claims should be found allowable, the examiner respectfully disagrees and asserts that the combined references cited teach the entire claimed invention, as evidenced by the grounds of rejection below. The further notes that the entire reference should be considered by the Applicant; however, the ground of rejection below along with the response to arguments fully supports the Examiner's position in rejecting the instant claims. The Applicant is encouraged to review some of the additional references cited considered pertinent to applicant's disclosure, but not used, made of record.

**Claim Rejections - 35 USC § 102**

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4.0 Claims 1-41 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al. (U.S. Patent No. 6,430,731).

4.1 In considering the independent claims 1,6, 11, 19, 29, and 33, Lee et al. teaches Beakes et al. substantially teaches a method for determining a worst-case transition, and particularly teaches the steps of determining at least a plurality of different arrival times and a plurality of different slews from a plurality of timing events propagated to an input of a gate of based on a timing model of the gate (*col.2 lines 16-33 and col.4 line 9-col.5 line 5; also see col.7 lines 4-10*); selecting one of the plurality of timing events propagated to the input of the gate as a worst case timing event based on at least a combination of an arrival time in the plurality of the different arrival times and a slew of the plurality of different slews of the plurality of timing events (*col.1 lines 23-27, and col.6 line 31- col.7 line 31, also see fig.11, col.14 lines 25-43; storing information related to the worst case timing event (col.14 lines 40-43 and col.15 lines 52-62)*).

4.2 As per claims 2,7, 12, and 20, Lee et al. teaches the step of determining a plurality of gate delays for a plurality of input signals based on the timing model of the gate (*see Lee et al. col.4 lines 27-43*).

4.3 With regards to claims 3,8, 13, and 21, Lee et al. teaches that the step of selecting the worst-case input timing event further comprises the step of selecting a worst delay based on the gate delays (*see Lee et al. col.15 lines 44-48*).

4.4 Regarding claims 4,9, 14, and 22, Lee et al. teaches that the timing model comprises  $To = Ti + Dg$ ,  $Dg = F(S_i, C)$ ,  $So = Q(S_i, C)$ , where  $To$  is an output time,  $T_i$  is an input time,  $Dg$  is a gate delay,  $S_i$  is an input slew,  $C$  is a capacitive load of the gate, and  $So$  is an output slew, wherein the delay  $Dg$  of the gate depends, at least in part, on the slew of the input transition and capacitive load at the output of the gate (*see Lee et al. col.4 lines 27-43*).

4.5 Regarding claims 5,10, 15, and 23, Lee et al. teaches that the timing model is a timing library format (FTL) model (*see Lee et al. col.5 lines 7-17*).

4.6 With regards to claims 16-18, Lee et al. teaches that the output slews of the output timing events includes slew rate of the output timings, which is determined by an amount of time for a waveform to transition from a first voltage to a second voltage (*see Lee et al. col.2 lines 16-33*).

4.7 Regarding claim 24, Lee et al. teaches that the different arrival times comprise the arrival times of the timing event at each input of the gate (*see Lee et al. col.2 lines 16-33 and col.4 lines 9-43*).

4.8 As per claim 25, Lee et al. teaches that the different arrival times of the timing event at each input of the gate comprises the input times of the timing events (*see Lee et al. col.2 lines 16-33 and col.4 lines 9-43*).

5.9 With regards to claims 26,30, and 34, Lee et al. teaches that the different slews comprise transition times of the timing events through the gate (*see Lee et al. col.3 line 65-col.4 lines 43*).

4.10 Regarding claims 27,31, and 35, Lee et al. teaches that the transition times of the timing events through the gate are based on characteristics of the gate (*see Lee et al. col.3 line 65-col.4 lines 43*).

4.11 As per claims 28,32, and 36, Lee et al. teaches that a duration of the transition times of the timing events through the gate is based on characteristics of the gate (*see Lee et al. col.3 line 65-col.4 lines 43*).

4.12 With regards to claims 37-41, Lee et al. teaches that information related to the worst-case timing event is stored in a memory (*see Lee et al. col.14 lines 40-43 and col.15 lines 52-62*).

### **Conclusion**

5. Claims 1-41 are rejected and **THIS ACTION IS MADE FINAL**. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2123

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andre Pierre-Louis whose telephone number is 571-272-8636. The examiner can normally be reached on Mon-Fri, 8:00AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul L. Rodriguez can be reached on 571-272-3753. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
